

Pointers for Exhibiting Eggs

General Considerations

Exterior soundness - Eggs should be well shaped and smooth, without visible ridges or calcium deposits. Avoid cracked eggs.

Cleanliness - Eggs should be very clean without stains. Avoid eggs with raised adhering dirt such as dirt, yolk or litter and/or prominent large or scattered stains.

Uniformity - Eggs in a carton should be as uniform in size, shape and color as possible. Do not mix brown and white eggs or eggs of different sizes together.

Good quality eggs protect consumer health. Factors that affect the safety of the product, such as cleanliness, are the most important.
